

OUTDOOR Campus

The Outdoor Campus 2017-2018 | Middle School Program Guide

4500 S Oxbow Ave | Sioux Falls, SD | 605.362.2777 | outdoorcampus.org

How Middle School Days Works

One of our most popular programs for middle school students is
Middle School Day.

Students spend an entire day at The Outdoor Campus, rotating
through 4 or 5 different stations.

Be sure to read the registration information.

Call (605) 362-2721 for more information.

The mission of Middle School Days is to provide an opportunity for students in
grades **6-8** to experience a variety of hands-on activities that will enhance their
own sense of place in the natural world.

In addition, they will be exposed to several skills common to South Dakota
outdoors, such as fishing, outdoor cooking and hiking.

Scientific procedures will be used whenever possible; including observation,
collection, identification and evaluation are also taught.

Once classes are selected you will need to decide which activities you would
like in the event of inclement weather.

These classes are marked with an asterisk*.

Alternative sessions will be planned at the discretion of
The Outdoor Campus staff if needed.

**Most activities can be taught individually if your class
was not selected for a MSD.**

How many students can come each day?

The Outdoor Campus can accommodate up to 80 students each day. Larger schools may need to come two separate days. Smaller schools can combine grade levels to bring the maximum number or may be able to join another smaller school for the day.

When are Middle School Days?

Selected Thursdays. See page in booklet for actual dates.

How long will we be at The Outdoor Campus?

Students will be at The Outdoor Campus from 9:30 am to 2:00 pm. During that time, they will rotate through 5 stations, with the exception of a few winter activities. Also included is a lunch break. Please be on time as we start promptly at 9:30.

What are my responsibilities?

In addition to preparing your students for this experience, you must provide at least 5 chaperones. The Outdoor Campus staff will briefly cover the roles of your chaperones the morning of your visit. Each student, chaperone and teacher must also bring a sack lunch. There is not access to a kitchen for students or teachers at TOC.

How many times can I come to Middle School Days?

Due to the popularity of this day, schools are allowed to participate once a school year. We do offer these days every season. (Fall, Winter and Spring).

Requirements

Because our building is funded by the sale of hunting and fishing licenses we require fishing and archery to be stations for Middle School Days.

Application Procedures

To Register for Group Programs:

1. Fill out the application form completely. You can drop it off at The Outdoor Campus in person; mail it to 4500 S. Oxbow Ave., Sioux Falls, SD 57106; fax it to (605) 362-2704; pull up our web site at:<http://gfp.sd.gov/outdoor-learning/outdoor-campus/east/classes-and-events/schoolprograms.aspx> and complete it online. You may want to call to make sure your application went through to the campus if submitting online.

This must be done by 5:00 p.m. on **September 5, 2016** to get in the first drawing. Any slots still open will be filled on a first-come, first-serve basis. The Outdoor Campus follows the Sioux Falls School District calendar.

2. On September 6, 2017 beginning at 8:00 a.m., Campus staff will select names randomly and number them in the order drawn. The schedule for the year will then be filled in, beginning with application number 1 and continuing until all slots are filled or all applications are scheduled. Any remaining slots will be filled on a first-come/first-serve basis.
3. Everyone will be contacted after the drawing and within the next week concerning registration. If you sent in an application after the drawing you should receive an email or call about your request. If you do not hear from me, please call.

Descriptions for station options follow.

The following options will be available for participating schools.

Introduction to Archery (Required) (Fall & Spring)

Introducing students to a lifetime sport such as archery has benefits inside and outside the classroom. This class will teach your students the basics of archery in a fun and safe environment. Getting kids active in the outdoors makes it more likely that they will serve as stewards of our state's bountiful natural resources as well.

Fishing (Required)

Fishing is another great lifetime sport that people all over South Dakota enjoy. Learn the basics of fishing, necessary equipment, casting techniques and how to bait your hook.

***Wildlife ID** (All year)

This session will focus on identifying South Dakota's wildlife through the use of skins, skulls and mounts. After students identify each object, we will cover some of the adaptations of these animals. Students will also learn the importance of wildlife, such as why the state bird is responsible for bringing millions of dollars to our state.

Orienteering (All year)

This is a sport that uses a detailed map to select routes while navigating through unfamiliar terrain. Orienteering will help with your student's map reading skills, concentration and the ability to make quick decisions about the best route to take. This sport can be enjoyed by a walk through the natural habitats at The Outdoor Campus or as a competitive race.

Haiku Hike (All year)

This hike is for teachers who want to challenge their students as writers but also to enhance and facilitate outdoor recreational hiking for users with varying skills and abilities. Students will use their senses as they explore natural habitats while hiking around the campus. Students will create a haiku using the information that has been gathered on the hike.

***Skins and Skulls** (All year)

Animal skulls can tell us many things about creatures and how they once survived in their natural environment. A few relatively simple observations of an animal's skull can tell us what the animal ate, whether the animal was predator or prey, and which senses were most important to the animal's survival. This activity will teach students some of the differences and similarities among animals. Later, the students will have the opportunity to put this new knowledge into practice with a "hands-on" activity.

*Mystery Tree Challenge (All year)

Students will be introduced to basic terms of tree identification and then be given a mystery tree sample in which they will identify by following a series of clues posted around the room. This activity introduces the concept of classification in a way that addresses all learning styles. It works well for auditory, kinesthetic and visual learners.

Wetland Ecology (Fall & Spring)

South Dakota's wetlands are special habitats important to wildlife and humans. We will explore the ecology of our very own wetland environment at the campus while looking for macro-invertebrates to identify. We will also learn how pollution affects our precious natural resource-water.

*Owls: Who Gives A Hoot? (All year)

Here's real-life learning! Students can learn about food chains/webs, owl's adaptations and more through the investigation of *owl pellets*.

Students will dissect an owl pellet to determine what was eaten. The contents of a bird's pellet depend on its diet, this can include the exoskeletons of insects, indigestible plant matter, bones, fur, feathers,

*Native American Games (All year)

Go back in time and learn some of the old tribal games that taught values to the many Native American cultures. Honor, respect, courage, humility, persistence, tolerance and other skills are just a few features of these remarkable games. These games teach skills through movement, problem solving, patterns, estimation, intuition, eye-hand or eye-foot coordination, dexterity and speed. These shared survival and hunting skills use unique cultural expressions of the different tribes and will bring out the best in your students and their

Outdoor Cooking (Fall & Spring)

Whether you are cooking in your own backyard, at a picnic area or in a campground, this session will focus on fire building, safety and the “how to” of outdoor cooking. Students will make some quick and easy snacks! (ALERT: This class does include peanut butter.)

***Going WILD at TOC (All year)**

Students will participate in one or two team building activities. These activities focus on problem solving, decision making, adaptability and planning. The activities promote teamwork, cooperation and communication while learning about some aspect of nature. Many of the activities come from Project Adventure or Project Wild. An asterisk * indicates that this activity can be played outside only during fall and spring months.

Pick 2 of the following;

1. *Habitat Game/Project Wild
2. Save our Pheasant Eggs/Pipeline/Project Adventure
3. South Dakota Jeopardy
4. Save the Environment/Dots/Project Adventure
5. *What do Bears Eat?/Project Wild
6. *Slackline
7. Food Chain Story Cards
8. Don't Pollute Our Waters (Wetland ecology activity and macro-invertebrates dice game)

Middle School

Ice Fishing (Required / Winter)

Students will learn about the appropriate clothing and gear for an ice fishing outing. They will learn and demonstrate safety precautions necessary for ice fishing. Students will also apply the techniques of ice fishing as they participate in an ice fishing experience on the pond at The Outdoor Campus.

Snowshoeing (Winter)

Snowshoeing is a great way to experience the outdoors in winter. Snowshoeing provides not only a way to enjoy nature, but also has physical health benefits as well. Snowshoeing health benefits include cardiorespiratory conditioning and the development of lower body musculoskeletal tissue as well as several other benefits to the body and mind.

Cross Country Skiing (Winter)

(4 classes with this activity due to finding shoes and ski size)

Understanding the basic techniques of cross country skiing, safety issues, and general know how will make this activity a pleasant experience for all. Students will focus on choosing the correct skis and shoe size, follow the general rules of marked trails and staying on track as they practice moving on the skis using very basic techniques.

These dates are available for
middle schools.

Be a Volunteer!

Volunteer Opportunities

By becoming a volunteer at The Outdoor Campus, you will experience a variety of opportunities that will increase your own and other's awareness of South Dakota's great outdoors!

Examples include:

Give back to your com-

- Program Assistance (fishing, paddling, outdoor cooking, etc.)
- Gardening
- Animal Care
- Special Events (Outdoor University, Women's Try-It Day, Halloween Hike, etc.)
- Front Desk Duty

How To Get Started!

1) Submit a completed application form on The Outdoor Campus website.

www.outdoorcampus.org

2) The volunteer coordinator will call to set up an interview once your application is received and reviewed.

3) Once your interview is completed and a background check is completed, the volunteer coordinator will schedule an orientation to get you more familiar with The Outdoor Campus and what you'll be doing here!

4) Finally, after the orientation, you'll be ready to start volunteering! You will be able to sign up online for whatever available programs you choose.

Our volunteers are the

How are these classes FREE?

Our funding comes from the sale of hunting and fishing licenses in South Dakota. If you like our classes thank a hunter or an angler.

How can we support The Outdoor Campus?

Buy a hunting and fishing license in South Dakota. Nationwide the sale of licenses is declining rapidly as we lose the Baby Boomer Generation. They were the last large group of hunters and anglers. We need to replace the funds they put toward habitat, wildlife management, conservation, recreation and education. Every single license you buy in your family helps fisheries, pheasant habitat, and so much more—including The Outdoor Campus.

Do you get any other funds?

We do receive some funding from a Federal excise tax on hunting and fishing equipment sales. A small portion of each fishing pole or shotgun you buy can go toward hunting and fishing programs here.

20TH BIRTHDAY

This year we celebrate our 20th birthday! We're proud to say we've reached nearly 2 million people with our outdoor skills messages in the last 20 years. Thanks to all of

MISSION STATEMENT

The South Dakota Game, Fish and Parks provides sustainable outdoor recreational opportunities through responsible management of our state's parks, fisheries and wildlife by fostering partnerships, cultivating stewardship and safely connecting people with the outdoors.

2017 Full Time Staff

Thea Miller Ryan, director

Derek Klawitter, community and group program coordinator

Sandy Richter, special events naturalist

Shelly Pierson, school programs coordinator

Jason Nelson, Outreach Coordinator

Kyle Grogan, volunteer coordinator

Tonna Hartman, senior secretary

Lynn Purdy, night and weekend manager
